## HYCHLOR

### PRODUCT DESCRIPTION :

Liquid high foaming chlor-alkali detergent / disinfectant used for environmental cleaning of equipment in numerous industries.

### AREAS OF APPLICATION :

- Food Factories.
- Dairies and related industries.
- Fishing factories and processing plants.
- Beverage industries.
- Meat processing plants.
- Bakeries and related industries.
- Industrial applications.
- Deep cleaning of toilets, showers, ablution blocks.

### BENEFITS :

- Relative long lasting foam to ensure maximum contact time for cleaning and disinfection to take place.
- Can be used in areas which are usually difficult to clean due to space inaccessibility.
- Hychlor can be diluted with sea water making it ideal for Fishing Trawler Factories out at sea.
- Combination of chlor alkali gives excellent cleaning.

### TO USE :

- Use product 2 - 5% (20 – 50ml per litre) water. Apply through a low pressure foamer unit with correct nozzle attachment.
- If cleaning manually, use rubber gloves, safety goggles, etc. and dilute 1 – 2% (10 – 20ml per litre) water. Ideally, warm water should be used (but not hot).
- Allow contact time of 5 – 15 minutes before rinsing surfaces with clean potable water.
- A 1% (v/v) solution will contain approximately 200 ppm active chlorine.

Before using Hychlor refer to material safety data sheet. (MSDS)

The seller makes no warranty, expressed or implied, concerning the accuracy or any results to be obtained from the use of any information and no warranty expressed or implied concerning the use of the products other than indicated above. The buyer assumes all risks of use and/or handling. No statement is intended or should be construed as a recommendation to infringe any patent
